

Welcome to the June edition of our Discovery Newsletter.

Hot off the press! Abacus ALS has launched a 'new and improved' research website. To celebrate, we are giving away 3 lots of 2 Gold Class Movie tickets simply for giving us your feedback! See below to check out our new website and be in the draw to win. Also see below for: research news articles, new products and special offers.

If there is anything that you would like to see more of in Discovery or for any other feedback please email marketing@abacus-als.com.

In this issue...

- Special Offer
- New Products
- Research News
- New Research Website
- Did You Know?

Special Offers

Find your best defense

Receive 20% off selected
Innate Immunity products
from AbD Serotec

Offer available til July 31st

New Products

EpiQuant - The breakthrough in Cell Signaling you've been waiting for!

Millipore proudly introduces their new Milliplex MAP EpiQuant cell signaling portfolio, a part of their top performing multiplexing range. Not only does this technology allow quantification of multiple phosphorylation sites in one well, but it also gives you the ability to measure total and phosphorylated sites at the same time.

For further information about EpiQuant email: research@abacus-als.com

New kidney toxicity panels available from Millipore.

Looking at kidney damage in humans? In the response to the growing need for more sensitive, rapid methods of identifying drug-induced kidney damage as quickly as possible, Millipore announces the release of 4 new Human Kidney Toxicity panels in its multiplexing range.

These easy-to-use, sensitive, reproducible and robust panels for the detection of 8 critical kidney toxicity biomarkers serve as vital tools for evaluating the toxicity of compounds during the pre-clinical drug development process.

Research News

Genesis Pathozyme® ElisaSure

Laboratories depend on accurate equipment to deliver dependable results. To ensure their performance is reproducible within known parameters, between maintenance periods and after repair, this specialist equipment should be meticulously checked and verified in line with international and national quality standards. Pathozyme®ElisaSure has been specifically designed to test all microtitre plate washers, microplate readers and manual and automated pipetting devices.

Innate Immunity

The innate immune system comprises the cells and mechanisms that defend the host from infection by other organisms in a non-specific manner. Natural killer (NK) cells are a subset of cytotoxic lymphocyte that function predominately in the innate immune response. They were named "natural killers" because of the initial notion that they did not require activation in order to perform their cytotoxic functions.

Jackson DyLight Dyes for Secondary Antibodies - better than Alexa Fluor!

Jackson DyLight Dyes are better than or comparable to the best fluorescent dyes available elsewhere. As they have greater photostability than the alternatives, they provide longer lasting staining. The Dyes are easier to visualise and provide colour of greater intensity! A range of fluorophores are available to cover the spectrum.

New ImmPACT peroxidase substrates available

The ImmPACT kit for formation is now available for all existing peroxidase unique substrates including: DAB, AEC, VIP, SG and NovaRED. The new kits generate greater sensitivity and crisper, darker staining precipitates than traditional peroxidase substrates.

New Research Website

Searching for Research Products has never been easier!

Take a look at our new and improved research website and go in the draw to win one of 3 sets of 2 Gold Class Movie Tickets!

Our website now lists products and useful resources by research area (ie Diabetes, Apoptosis, Cancer, etc). This means you can find the information you are looking for - all in the one place!

Visit www.abacus-als.com then Research Users and click on the competition tab to provide your feedback and go into the draw to win!

WIN

2 FREE Gold Class Movie Tickets!

Simply send us your feedback on our new research website to go in the draw.

To enter visit: www.abacus-als.com

Did you know?

If all of your DNA was stretched out it would reach the moon.

A person remains conscious for eight seconds after being decapitated.

Snakes are true carnivores because they eat nothing but other animals.
