

# Bovine Interferon $\gamma$ ELISA Kit

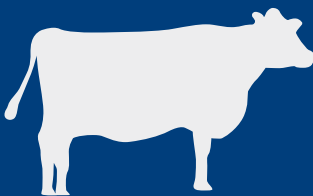

NEW

## Convenience with complete flexibility

- ✓ Wide performance range: 0.025 - 50 ng/ml
- ✓ Guaranteed for serum, plasma and cell culture supernatant
- ✓ Cost efficient
- ✓ Quantitative results

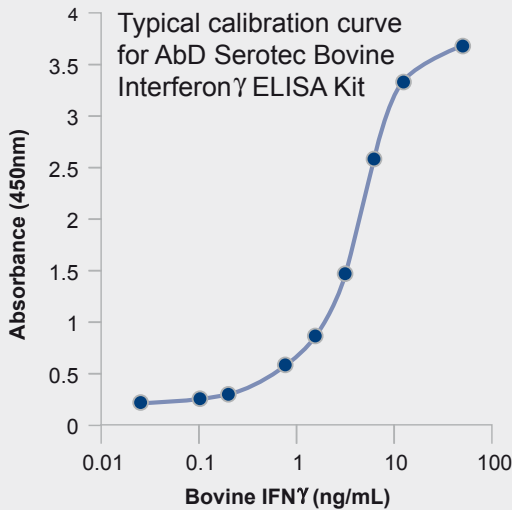

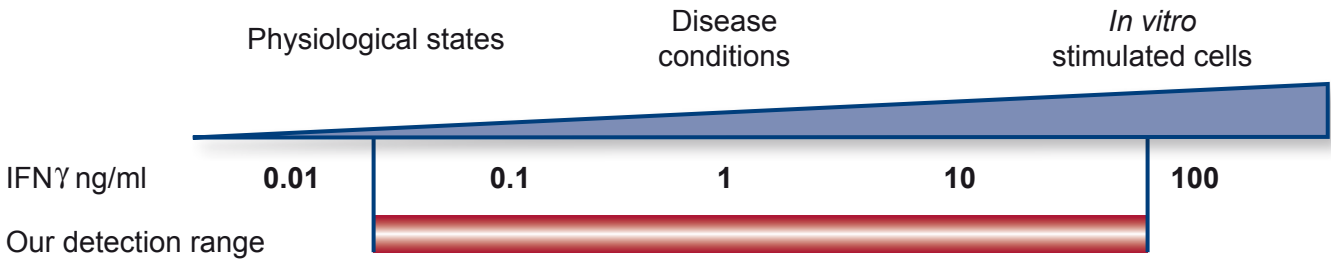

## BOVINE Interferon $\gamma$ ELISA KIT

The AbD Serotec Bovine Interferon $\gamma$  kit, MCA5638KZZ, is a sandwich ELISA (5 x 96 wells) using two well characterized mouse monoclonal antibodies and recombinant bovine interferon $\gamma$  as a standard.

Designed for the **quantitative** determination of bovine interferon $\gamma$  in serum, plasma and culture supernatant, MCA5638KZZ comes complete with: antibodies, plates, coating buffer, recombinant bovine interferon $\gamma$  standard, HRP conjugate & HRP substrate.

# So easy to use, So broad in application

## Detection Range 0.025 - 50 ng/ml

The AbD Serotec Bovine Interferon $\gamma$  ELISA kit delivers results across a detection range that covers physiological levels, disease states, and *in vitro* stimulated cells.

- Coat plate
- Add blocking buffer
- Add standards/samples
- Add Strep:HRP conjugate
- Add TMB
- Add stop solution
- Read results

✓ Analytical Time <5hrs

✓ Easy to use

**Same Day Results**
