

MAGPIX® INSTRUMENTATION

SPECIAL OFFER

Purchase a Magpix for \$35,000*

Simply mention "Lorne" when placing your order

Simple and easy to use

No need for manual adjustments to probe and plate settings. No external modules are needed as the XYP unit, drive fluid and waste containers are built in.

Robustness and reliability

Due to the nature of the optics (LED/CCD Camera) we see a more robust optics platform than the existing Luminex platforms - which means you can be assured of reliable results.

Compact and portable

This small compact instrument requires little space making it portable from bench to bench or lab to lab with just a single connection to an all-in-one monitor / PC.

Ongoing affordability

Not only is the system the most affordable to purchase, our ongoing service contract is also less costly than traditional Luminex platforms.

**A new generation
multiplexing platform
- the most affordable
solution available**

Catch the new wave in Multiplexing...
