MACRO DIGITAL IMAGING SYSTEM FOR THE GROSSING ROOM

Designed to capture, store and retrieve digital images when grossing organs

Features

- Full documentation of specimen from arrival
- A major visual complement to standard descriptions, eliminating vague descriptions of shape, size and colour
- Eliminates hand drawings or long descriptions
- Enables detailed observation and documentation through 10x optical magnification
- Images are available to all pathologists at any time through LIS

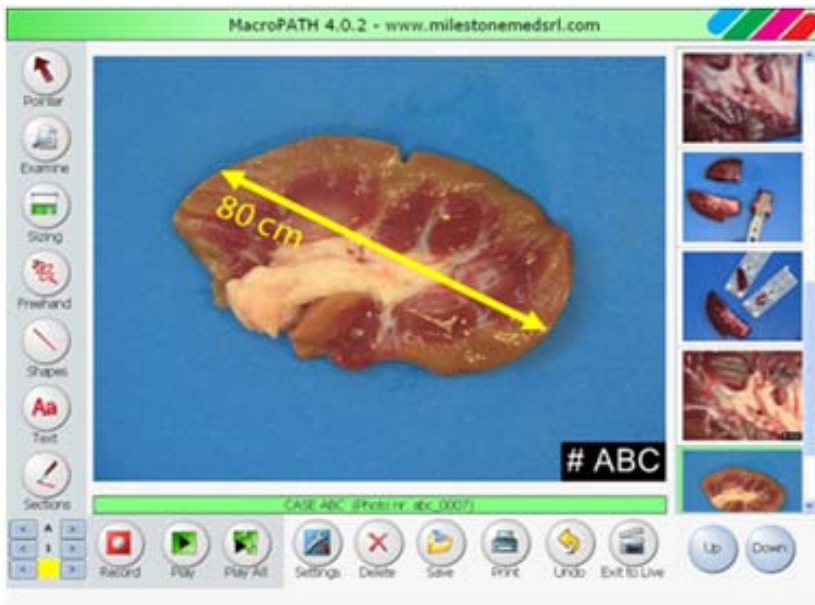

Digital Camera

Control Terminal

Keyboard

Mobile cart

Foot control module

Allows the user to
measure, label or
record sounds or video
of specimen all in the
grossing room!
